

Translink Challenge

For our third and final active travel to school week, we took part in the 'Translink Challenge'. All pupils were encouraged to travel actively to and from school once again. There was a good response this time. Maith sibh!

Once again, the Eco Committee would like to take this opportunity to remind our school community of the importance and benefits of active travel both for ourselves and our environment. If you can't actively travel the full distance, why not set up a car pool with another family or even park up and actively travel part of the way?
